

	<p>AI Dynamics Inc., formerly DimensionalMechanics Inc., is a global organization founded on the belief that everyone should have access to the power of artificial intelligence (AI) to change the world. The company's NeoPulse® Framework is a robust end to end AI platform for experts and non-experts alike, transforming how organizations innovate and grow, at a fraction of the cost, expertise, or resources traditionally associated with artificial intelligence. AI Dynamics has created the only AI platform that provides data governance and can be deployed on any on-premise device, cloud, or IoT environment.</p> <p>Founded in 2015 and based in Bellevue, WA, AI Dynamics is making AI attainable and scalable for leading research institutions and large enterprises in industries such as Biotech, Bioinformatics, Healthcare, Industry 4.0, and Pharmaceutical. For more information, visit <a href="https://www.AIDynamics.com">https://www.AIDynamics.com</a>.</p>
	<ul style="list-style-type: none"> <li>• Key patent portfolio</li> <li>• Decades of experience in the fields of machine learning and artificial intelligence from leading companies and research organizations</li> </ul>
	<ul style="list-style-type: none"> <li>• Headquartered in Bellevue, Washington.</li> <li>• 11 full time employees</li> </ul>
	<ul style="list-style-type: none"> <li>• \$10.1m in funding raised to date</li> </ul>
	<p><b>Partners:</b></p> <ul style="list-style-type: none"> <li>• AWS</li> <li>• Microsoft BizSpark</li> <li>• NVIDIA</li> <li>• Plug and Play</li> <li>• RAD, Research and Development</li> <li>• NetApp</li> <li>• Valence</li> </ul>
	<p>Typical AI solutions are solving problems for single use cases or specific industries and require machine learning engineering experts. AI Dynamics is industry and platform agnostic and has developed insights in industries such as Biotech, Bioinformatics, Healthcare, Industry 4.0 and Pharmaceutical.</p>

	<p><b>NeoPulse® Framework</b></p> <p>The NeoPulse® Framework is an end to end artificial intelligence platform that is simple to implement for every industry, business, and device. The NeoPulse® Framework is an intuitive development and management platform for AI that includes everything needed for a company to start building custom robust AI solutions. Leveraging existing staff, easy to learn programming language and a simple interface, NeoPulse offers a flexible suite of solutions to meet the needs of any organization.</p> <p>The easy to use NeoPulse® Framework is the only platform for experts and non-experts to transform data into information that can power better decision-making, increase efficiency, reduce costs, allow for new product discovery, better customer experiences, and reduced human error.</p> <ul style="list-style-type: none"> <li>• <b>NeoPulse® AI Studio:</b> AI to build AI. Server application with a powerful AI called 'the oracle' that is capable of automating the process of creating sophisticated AI models. The oracle learns from its experience and takes care of the programming details that would typically be written by an AI engineering expert.</li> <li>• <b>Portable Inference Models (PIM):</b> a neural network that is encapsulated in a container that can be queried using a runtime layer, also referred to as an AI Model. Provides a single standardized AI distribution mechanism across cloud, on-premise and on devices.</li> <li>• <b>NeoPulse™ AI Store:</b> AI model store (like an app store) that enables third parties to sell, license and manage their AI models to customers.</li> <li>• <b>NeoPulse™ Query Runtime:</b> a program that is licensed by the organization to allow any application in the enterprise to access the AI model using a web-based (REST) API.</li> <li>• <b>NeoPulse™ Modeling Language (NML):</b> an intuitive domain specific language (DSL) developed by AI Dynamics that is executed by the NeoPulse AI Studio to automate the creation of AI Models. Allows both machine learning experts and non-experts to efficiently and effectively build AI models.</li> </ul>
